

Hoval

Hoval Belaria® pro (24)

The heat pump that looks to the future.

Versatile | Quiet | Easy to install

Hoval | Responsibility for energy and environment

Hoval Belaria® pro (24)

Heat from the air – almost silently.

Air is an inexhaustible energy source. It is free and available everywhere in unlimited quantities. An air/water heat pump heats highly efficiently and reliably using this ambient air using auxiliary energy (electricity). And by making use of green energy or solar power – perhaps even from your own photovoltaic system – you will be able to generate heat even more sustainably.

Added value for your benefit:

- Versatile in use
- Quiet and economical
- Easy to install due to monoblock design.
- Integrated cooling function
- Power adjustment (modulation)

Belaria® pro (24)

A pioneering air/water heat pump in a monoblock design that not only heats and provides domestic hot water, but also cools in the summer. It extracts heat from the ambient air and is available as a wall-mounted indoor unit with built-in TopTronic® E control.

Suitable for multiple dwelling units – new building and refurbishment.

CleverCool inside

EnergyManager PV smart

Natural refrigerant

Versatile in use

Installed outdoors, there will always be a perfect place for the Belaria® pro. Since it runs with a natural refrigerant, it meets the legislation of tomorrow – today. The Belaria® pro saves space inside the home. The indoor unit with built-in TopTronic® E control is mounted on the wall. With the integrated CleverCool function, the heat pump even cools the rooms in summer. Due to its flow temperature of up to 70 °C, the Belaria® pro is ideal for renovation projects. The existing radiators can thus continue to be used.

The Belaria® pro (24) with its wall-mounted indoor unit is ideal for integration into a heating system. With the HovalConnect package of extras, the heat pump can be connected to the internet and controlled via a smartphone or computer.

Quiet and economical

Practically no noise is generated inside the home, as all of the steps required for the Belaria® pro to produce heat are carried out in the outdoor unit. The large fan installed in the outdoor unit conveys more air, i.e. more energy, almost silently. The infinitely variable

adjustment of output to demand, known as modulation, also ensures quiet operation. This function, combined with high-quality components and the TopTronic® E controller, is responsible for the product achieving high levels of efficiency throughout the year. The controller is connected to the internet, so is able to optimise heating and cooling according to the weather forecast.

The EnergyManager PV smart also helps you save money. By using this standard, free feature together with HovalConnect, you will use more power generated by your own photovoltaic system and therefore consume less from the public grid.

Easy to install due to monoblock design

Both the indoor and outdoor units of the Belaria® pro come ready for connection. The two are connected by a line containing the domestic hot water that has been heated up. Compact dimensions make transport easy. The standardised TopTronic® E controller means virtually any combination of Hoval products can be turned into systems in no time.

Hoval Belaria® pro (24)

Precise comfort on request.

Selection options available for domestic water storage tank

4

Belaria® pro (24)

CleverCool inside

EnergyManager PV smart

Flexible storage tank selection.

The wall-mounted indoor unit of the Belaria® pro (24) offers complete flexibility for heating, cooling and hot water.

If the Belaria® pro (24) should also prepare domestic water, a suitable calorifier must be installed via an external 3-way switching ball valve.

The capacity and material of the storage tank can be chosen to meet the user's specific needs in terms of comfort and available space. Hoval offers a wide range of possibilities.

An existing storage tank for domestic water can still be used if necessary (note the minimum surface area of the heat exchanger). Activate the built-in thermal disinfection function and legionella bacteria don't stand a chance.

Hoval Belaria® pro (24) Technology and system.

Hoval Belaria® pro		(24)
Room heating energy efficiency «moderate climate» 35 °C	ηS	225
Room heating energy efficiency «moderate climate» 55 °C	ηS	165

Effective in a system

Hoval supplies all components for an efficient heating and room air system.

The Hoval TopTronic® E system controller combines all components into an efficient overall system.

This solution ensures you are provided with standardised operation and matching components.

**Hoval
heat generators**

**Hoval
solar plants**

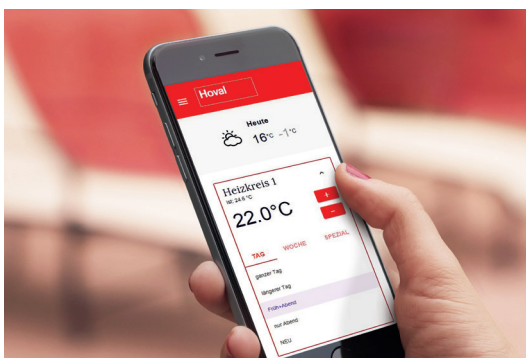

**Hoval
storage tanks**

**Hoval
comfort ventilation**

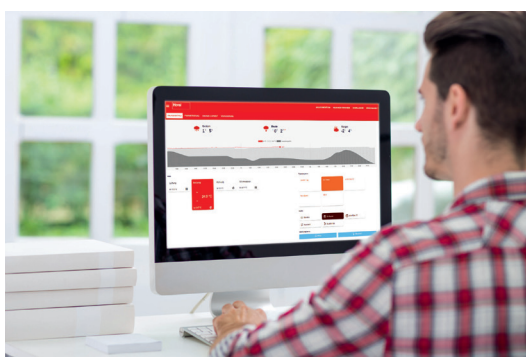

Hoval TopTronic® E as little control as necessary.

Straightforward

One control system for everything. You do not need to worry about a thing. Once set up, the TopTronic® E system controller automatically provides the right temperature in your rooms, hot water and even a pleasant supply of fresh air.

Convenient

Operate your Hoval system from anywhere. The HovalConnect online service allows you to operate your system via the Internet from home or via an app when you are on the go. The app lets you adjust temperatures, select the programmes you want or switch your system from holiday mode. It even takes into account the weather forecast, preventing rooms from overheating and saving on expensive heating energy.

Informative

The room control module's large display enables you to view information ranging from the most important system data down to the weather forecast. The HovalConnect dashboard also lets you check your system's output and consumption data. And no matter which unit you're using, the heating system automatically reports when service is required or faults occur.

Hoval TopTronic® E

is the uniform system controller for Hoval heat generators and comfort ventilation as well as other components such as solar plants or calorifiers. It connects the individual components and ensures that they interact in the most energy-efficient manner. All the connected components can be adjusted using the same control module. HovalConnect enables the Hoval TopTronic® E control system to be accessed via a browser or a smartphone app.

We are there for you And we have been for generations.

Consulting and design

Whether you're looking for a heating, cooling or ventilation solution, for a new building or a renovation project, Hoval is here to give you expert advice. Do you design, install or operate systems? Or are you an investor? Then we speak your language. Experienced Hoval consultants gain an in-depth understanding of your requirements and suggest appropriate solutions on that basis.

Service expertise

Do you need to have a system commissioned or serviced? Hoval customer service technicians are here to help. Regular maintenance will give your system a longer service life. Your investment will maintain its value over many years and operation will remain as economical as possible.

Hoval quality.
You can count on us.

Hoval

Hoval is one of the leading international companies for heating and indoor climate solutions. Drawing on more than 75 years of experience and benefiting from a close-knit team culture, the Hoval Group delivers exciting solutions and develops technically superior products. This leadership role requires a sense of responsibility for energy and the environment, which is expressed in an intelligent combination of different heating technologies and customised indoor climate solutions.

Hoval also provides personal consultations and comprehensive customer service. With around 2200 employees in 16 companies around the world, Hoval sees itself not as a conglomerate, but as a large family that thinks and acts globally. Hoval heating and indoor climate solutions are currently exported to more than 50 countries.
